

Dynamic Website Development Proposal

Prepared By: TheDataVue Technologies

Website: www.thedatavue.com

Project Overview

TheDataVue Technologies proposes to design and develop a modern, responsive, and dynamic business website. The website will provide a professional online presence, allow easy content management, and support future scalability.

Website Pages

- 1 Home Page – Business overview, banner, highlights, call-to-action
- 2 About Us – Company profile, mission, vision
- 3 Services – Dynamic service listing with detail pages
- 4 Products – Product listing and descriptions (if required)
- 5 Contact Us – Contact form, address, phone, email, Google Map
- 6 Additional Pages – Gallery, Testimonials, FAQs (optional)

Technology Stack

- 1 Frontend: HTML5, CSS3, fully responsive design
- 2 Backend: PHP Laravel Framework
- 3 Database: MySQL
- 4 SEO-friendly and secure architecture

Admin Panel Features

- 1 Secure login system
- 2 Manage pages, services, and products
- 3 Handle customer enquiries
- 4 Easy content updates without technical knowledge

Domain & Hosting

Domain Name (.com / .in): ■800 – ■1,200 per year

Linux Hosting with SSL & Email: ■2,500 – ■4,000 per year

Cost Estimate

Website Development Charges: ■20,000 – ■25,000 (one-time)

Domain & Hosting: ■3,500 – ■5,000 per year

Project Timeline

Total development time: 12–15 working days from approval of design and content.
